Education

University of Pennsylvania

Aug 2026 – May 2028 (Expected)

Master of Applied Science, Computer Science

Philadelphia, PA

- Courses: Software Development, Data Structures and Software Design, Computer Systems, Algorithms

National Taiwan University

Sep 2021 – Jan 2026

Bachelor of Business Administration, Concentration in Operations and Data Analytics

Taipei, Taiwan

- Cumulative GPA: 3.95 / 4.0; Two-time Dean's List Recipient (Class Top 5%)

Technical Projects

StreamLens, Real-Time Event Pipeline with AI Anomaly Diagnosis

May 2026 – Present

Creator | Python, Kafka, DuckDB, Parquet, RAG

- Engineered a data pipeline on distributed event streaming (Kafka) that ingests live GitHub events, lands them as Parquet with PyArrow, and serves analytical queries in DuckDB over continuously arriving data
- Building an agentic diagnosis loop where detected anomalies trigger RAG retrieval (DuckDB vector search) and an LLM ranks root-cause hypotheses with confidence labels, with autonomy boundaries that defer auto-ticketing to preserve human oversight and control LLM cost and reliability

Down, AI-Powered Group Scheduling App

Jul 2026 – Present

Founder | Next.js, Supabase, LLM APIs

- Shipped a full-stack scheduling app (Next.js 14, Supabase, deployed on Vercel) where an LLM parses calendar screenshots and natural language into structured availability data, with the system proposing times and users making the final call
- Launched to 70+ organic visitors in week one with over half entering the event-creation flow; synthesized user interviews into an integration roadmap led by Google Calendar

Research Experience

NTU Financial Data Analytics Lab

Sep 2025 – Mar 2026

Data Science Research Assistant (Advisor: Prof. Chen-Ting Lien)

- Engineered a Selenium scraping and LLM classification pipeline processing 18,000+ corporate comment letters spanning 91 accounting changes, applying a lobbying-alignment measurement framework defined from academic literature
- Validated model output against human-coded letters, reaching 80% directional agreement with zero contradictions, and identified statistically significant positive abnormal returns among aligned firms in a 1,000+ firm sample

Professional Experience

Delta Electronics

Jul 2025 – Jan 2026

Business Transformation Intern | Corporate Operations Strategy

Taipei, Taiwan

- Built ETL pipelines and Power BI dashboards monitoring 7,000+ global projects with 20+ standardized KPIs across 7 international teams, exposing sales and operational gaps that shaped a 4-BU restructuring roadmap for a \$50B portfolio
- Validated project management workflows across 4 pilot projects, cutting rework cycles 30% and reporting time 40%

Yahoo

Jun 2024 – Aug 2024

Product Manager Intern | Product Strategy

Taipei, Taiwan

- Synthesized 40 user interviews and 100 surveys into the insight that Gen-Z engages with news through user-generated perspectives, not institutional publishers, directly informing Yahoo's new product direction
- Led a cross-functional team to build a social-native news MVP, owning ideation through prototype and securing executive approval for continued development

BP

Jul 2023 – Aug 2023

Business Operations Intern | Market Entry, Renewable Energy

Taipei, Taiwan

- Built internal Excel tools that improved milestone visibility for renewable energy teams across Taiwan and Singapore
- Established bp's brand presence in the new Taiwan market with UK headquarters, revamping the local website and initiating university research partnerships for new agrivoltaics applications

Technical Skills

Programming Languages: Python, Java, C++, SQL, JavaScript/TypeScript

Systems & Data: Kafka, DuckDB, Parquet, ETL pipelines, Unix/Linux, Docker

Web & Backend: Next.js, Supabase, REST APIs, Git

AI & Analytics: LLM APIs, RAG, Pandas, Selenium, Power BI, VBA
